

ELEMENTS

ARTGLASS
CHANDELIERS FROM BOHEMIA

ABOUT ELEMENTS CATALOGUE

Welcome to our latest catalogue, which comes packed full of new collections that are all connected by their airy and contemporary design. Each of the elements within the individual collections is an interesting piece of design in itself, but it is only when they are combined in a larger installation that we can fully enjoy and appreciate their beauty.

ABOUT US

ARTGLASS Ltd. is a Czech producer of original and design-led lighting made from high-quality materials with a high proportion of manual craftsmanship.

Our production programme can be divided into three branches:

- the production of traditional Czech crystal chandeliers - we are a proud follower of more than 500 years of tradition in chandelier production in the Czech Republic,
- custom lighting – lighting projects for settings such as hotel receptions, palaces, castles, villas or religious buildings,
- contemporary design collections – our original vision of transforming a project installation into a smaller model that will suitably complement a contemporary home.

We hope that our lighting fixtures will bring you joy – just as they have delighted many customers before you.

ELEMENTS LIGHTS

The individual elements of these collections hide the light source, and they can therefore be used as separate lighting fixtures as well as large lighting installations.

CHEERS

Playfulness. Wit. Fun. That is Cheers! A playful collection that uses whiskey or water glasses in an unconventional way. The result is a lighting fixture that has the ambition to become a unique addition to bars, lounges or living rooms.

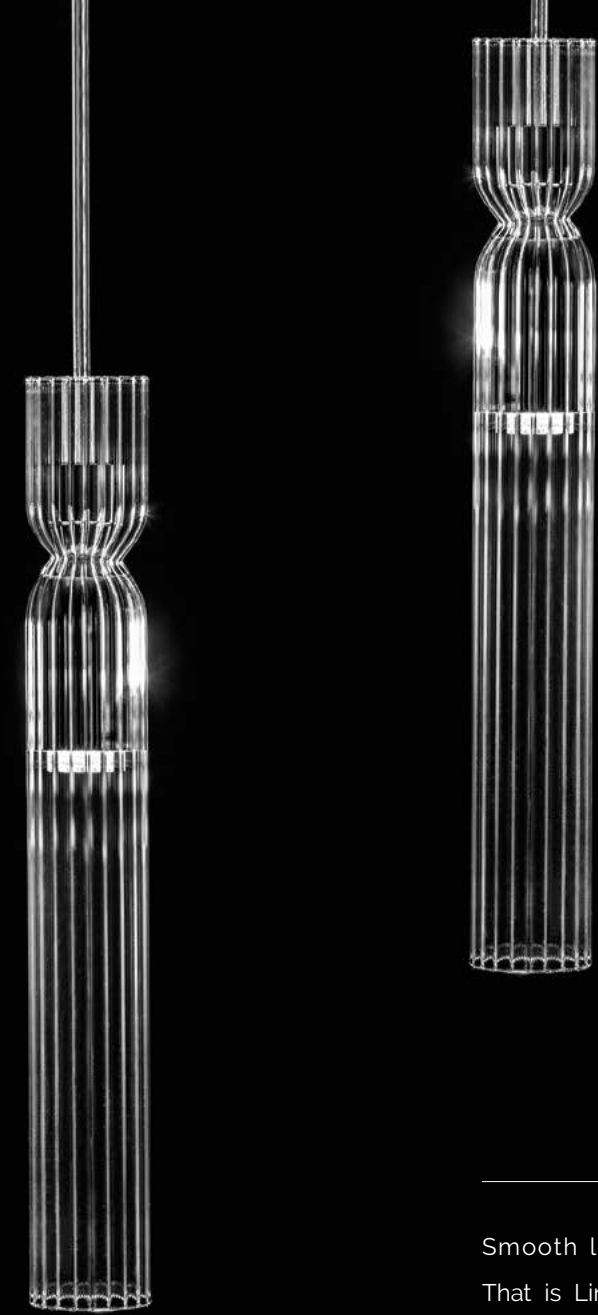

CHEERS

Playfulness. Wit. Fun. That is Cheers! This version is full of playful water glasses with sandblasted patterns used in an unconventional way. The result is a lighting fixture that has the ambition to become a unique addition to bars, lounges or living rooms.

BLOOM

Freshness. Spring. Fragility. That is Bloom. Another of our collections is inspired by Nature's motifs. Individual flowers, whether clear, plated or sandblasted, form an airy and delicate installation.

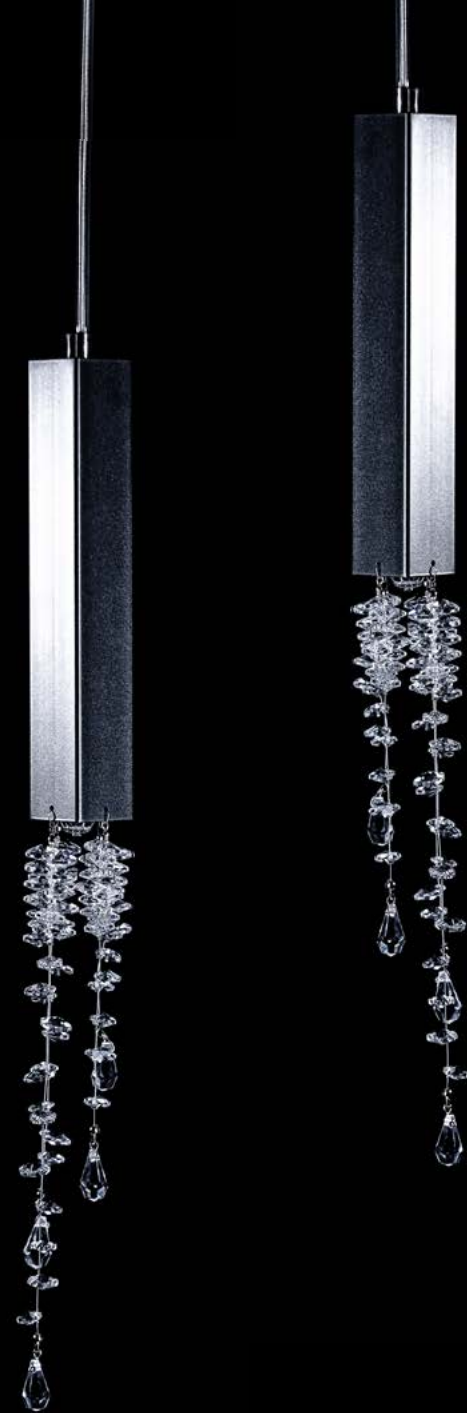

LINE

Smooth lines. Glitter. Aesthetic simplicity. That is Line. Minimalist collection suitable for contemporary interiors. The smooth lines of the glass tubes showcase a captivatingly simple, fresh design.

TRIS

Shine. Originality. Uniqueness. That is Tris. An interesting collection featuring a simple, clean-cut lighting fixture design, enlivened by glittering prisms.

TRIS VEIL

Shine. Originality. Uniqueness. That is Tris. Tris Veil is based on the popular Tris collection, but its simple and clean design is enlivened with a veil of trimmings.

RAINFALL

Freshness. Simplicity. Minimalism. That is Rainfall. Even with the Rainfall collection, we stick to a clean and simple design that fits into modern and classic interiors. The wow factor is then the chains of trimmings arranged in the shape of rain drops.

FROZEN

Ice. Nature. Art. That is Frozen. Frozen is inspired by the frost painting on the windows in winter. A strip of glittering trimmings winds over the shiny, metallic surface of the pendant, which adds an unmistakable charm to the simple lighting fixture.

CRYSTALLO

Gloss. Contrast. Sharp lines. That is Crystallo. Crystallo offers a combination of modern shape with classic glittering trimmings. The modern black design of the frame contrasts with the gloss of the trimmings arranged in a decorative flower. If you prefer a simple design, we have a version with a sandblasted cover of the light source, which further emphasizes the minimalist design of the pendant.

ALMOND

Glitter. Design. Novelty. That is Almond. Like the Crystallo collection, Almond plays with a simple, this time rounded almond shape in a modern black color, which is enlivened by interestingly placed glittering trimmings.

ELEMENTS DECOR

The individual elements of these collections do not contain a light source and the installation must therefore always be illuminated externally.

POLYGON

Shine. Design. Creativity. That is Polygon. The individual elements are formed by a variation of smoky bent glass and polished metal patterns.

LEAF

Autumn. The cycle. Rebirth. That is Leaf. Collection inspired by falling autumn leaves. The combination of glittering glass and metallized leaves will prove an unmissable addition to any interior.

QUERCUS

Roots. Strength. Steadfastness. That is Quercus. The glittering glass leaves of the oak illuminated from the ceiling will bring a piece of nature and the values that this majestic tree represents into the heart of your home.

ELMAS

Diligence. Readiness. Creative spirit. That is Elmas. This symbolism of the elm tree is brought into your interior through the many leaves falling from the ceiling.

MONSTERA DELICIOSA

Huge. Glittering. Photogenic. That is Monstera Deliciosa. The embodiment in glass of the queen of houseplants is bound to attract the attention of every visitor.

AGAR

Luxury. Earthiness. Mysticism. That is Agar. The glass leaves of the Agar tree, whose wood is sometimes nicknamed 'liquid gold', will bring a breath of luxury and uniqueness to your interior.

CINNAMOMUM

Intensity. Incisiveness. Warmth. That is Cinnamomum. Our installation with cinnamon leaves will shine through and warm up your interior.

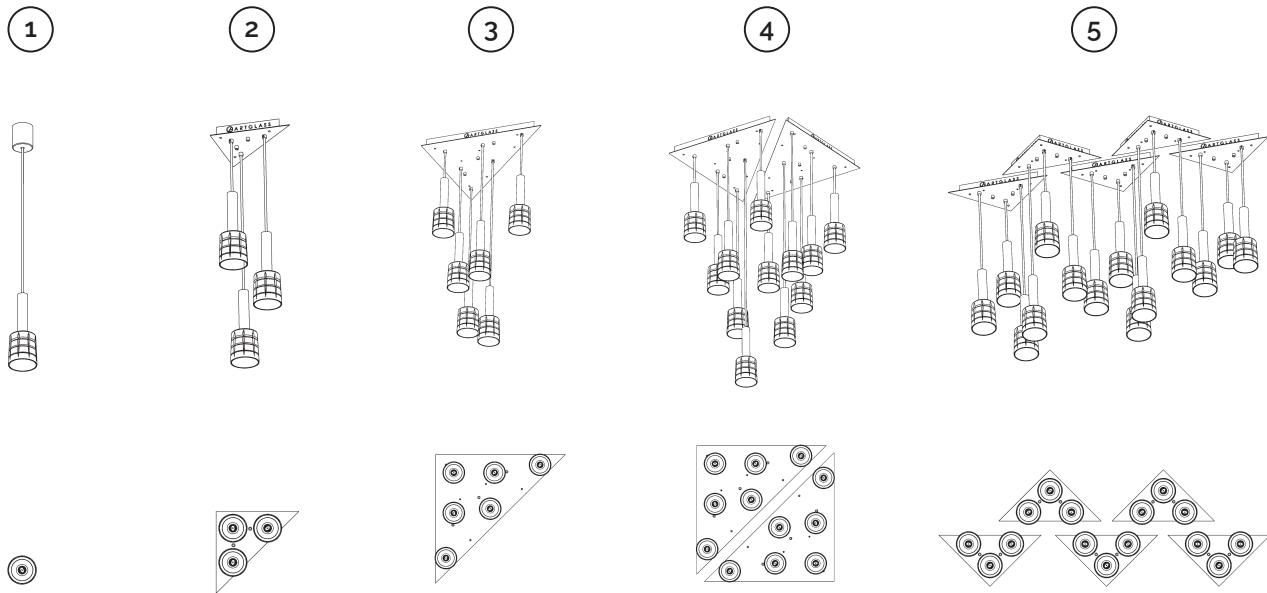

SHAPE of GINKGO

Positivity. Health. Future. That is Shape of Ginkgo. Like the unique leaves of the Ginkgo tree, their rendering here in glass is unique and gives the interior a touch of singularity.

Cheers, Bloom, Line, Tris, Rainfall, Frozen, Crystallo and Almond collections

The individual elements of these collections hide the light source, and they can therefore be used as separate lighting fixtures as well as large lighting installations. For easy handling, several types of ceiling attachments have been designed to allow you to position collections them in a wide variety of locations – they can also be interconnected to create more complex and therefore richer shapes and installations.

Polygon, Leaf, Quercus, Elmas, Monstera Deliciosa, Agar, Cinnamomum and Shape of Ginkgo collections

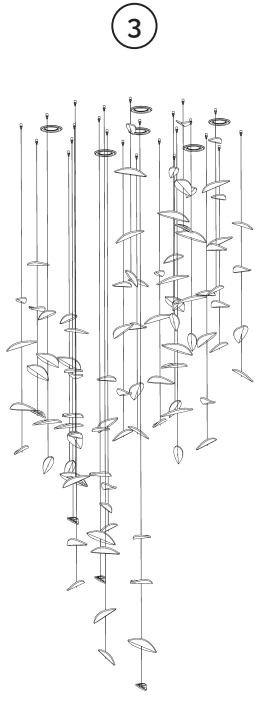

The individual elements of these collections do not contain a light source and the installation must therefore always be illuminated externally. The hanging elements can be placed on ceiling attachments or fastened directly to the plaster-board. Placement directly in plasterboard then allows you to create an infinite number of unique installations.
