

Luminis

Luminis

The light of the sea, a proof of the sophistication of nature, is the inspiration for a lighting installation that shows the elusiveness of the beauty of glowing organisms that can light up the oceans. They possess great fragility and, at the same time, strength. All these aspects are hidden in the glass, which has become the core material of the installation. Nature is an inexhaustible well of inspiration and it is up to us whether we appreciate it.
