

ARTGLASS AT DESIGNBLOK 2018

TRADITION | CRAFT | *Innovation*

This year, we participated for the first time in the Designblok, Prague International Design Festival, the largest selection of design and fashion shows in Central Europe. Designblok is annually attended by over 200 exhibitors in the main area of Designblok, which consists of Superstudio, Openstudio and Art House.

Our stand at Superstudio showed the link between tradition, craft and innovation. Our new designs from the VISION catalog, special installations Manhattan, Luminis and Crack, were complemented by new design piece inspired by the traditional Maria Therese design of chandeliers. This lighting fixture, we called Zephyr, portrays the bells in the wind and it is a fresh combination of tradition and craft from the point of view of a modern designer.
