

SURFACE FINISHES AND COLOURS

ARTGLASS
CHANDELIERS FROM BOHEMIA

Our lighting fixtures are unique not only in their design, but also in the wide variety of colour options.

Thanks to our rich production experience and technologies, we are able to produce your chosen lighting fixture in a wide range of surface finishes, both metal and glass.

You can also choose from a wide range of offered shades and pendants.

Choosing a light that fits perfectly into your interior has never been easier.

CRYSTAL EXCLUSIVE TRIMMINGS

We offer the lighting fixtures with trimmings under our own certification mark Crystal Exclusive (CE).

The trimmings are machine-polished. Minimum 30 % of lead oxide in the crystal glass is guaranteed. The machine-polished trimmings provide high brilliance and decompose the light into what is known as spectrum.

COLOURED CHANDELIER TRIMMINGS

Clear trimmings are the most popular, but colouring them all or, for example, only the end trimmings, can enliven the lighting fixture.

METAL SURFACE FINISH – PATINA

The technology of patina and aging of metals offers a range of surface treatments suitable especially for classic chandeliers decorated with cast metal, which you can perfectly match with your interior.

METAL SURFACE FINISH – COLOUR SHADES

In addition to the common surface finishes of metal parts in golden (brass) and silver (nickel) shades, we also offer a range of tinted varnishes in modern shades, thanks to which you can truly personalize your lighting fixture.

METAL SURFACE FINISH – KOMAXIT

The metal parts of the lighting fixture can also be powder coated in a modern black, anthracite or white colour. On request we can paint the metal parts of the lighting fixture in any colour (according to the RAL colour chart).

Anthracite

Semi-matte Black

Metallic Black

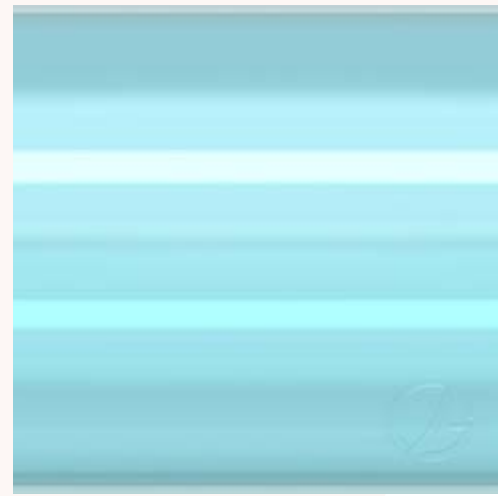

Structured Black

GLASS COLOURS

Thanks to hydroglaze technology, we can colour glass parts of a lighting fixture (bowls, vases, arms, balls, leaves, etc.) in a wide range of colour shades. Even in this case, if interested, we can offer almost any shade according to the RAL scale.

GLASS SURFACE FINISH

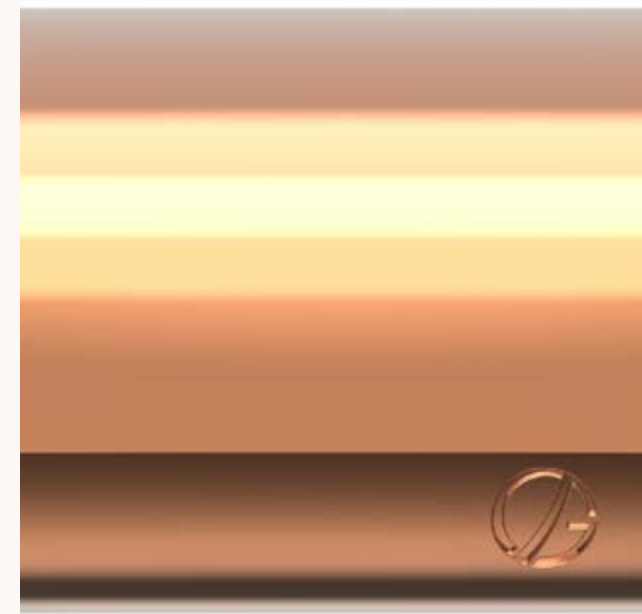

The glass parts of the lighting fixture can also be metallized, thus achieving completely new appearance possibilities. Another option is the use of sandblasting technology, which gives the glass a satin matte surface.

SHADES

Our lighting fixtures can be supplemented with shades made of smooth or pleated fabric in the colours listed on the following page. This will give the lighting fixtures a completely new look and add a unique atmosphere to your interior. The shape and size of the lampshades depend on the lighting fixture on which they are used.
